

FARM WORKS VIEW

FREE MAP VIEWING SOFTWARE FOR PRECISION FARMING DEVICES

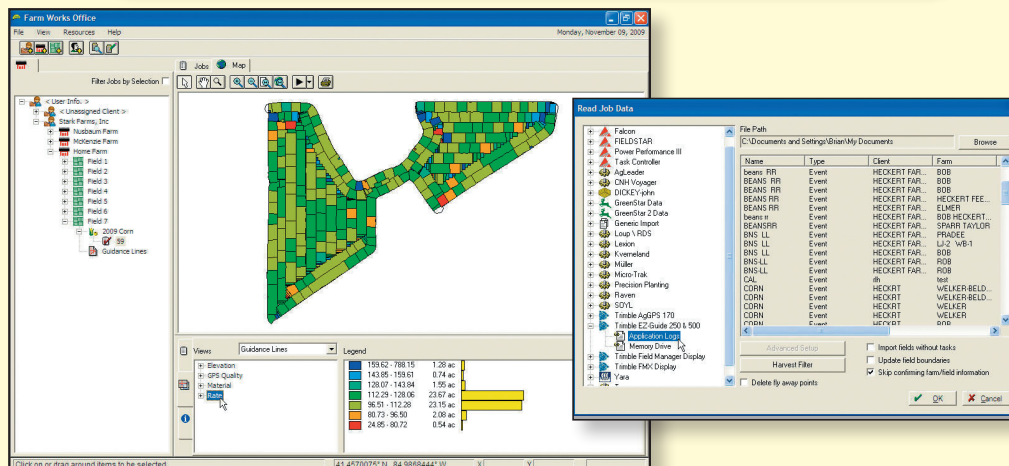

The free View software can read data from a wide range of precision farming devices in order to display and print yield maps, as-applied maps, coverage maps, and more. Other features of View include the ability to build a list of clients, farms, and field names. Once the list is customized to your needs, it can then be written to a wide range of precision farming devices for data management.

The View software can easily be upgraded to the Farm Works® office solutions without losing any previously entered data. When View is upgraded to the Farm Works office solutions, new and exciting features will be added to your software for:

- Displaying Google™ Maps.
- Importing other layers such as soil types and soil test results.
- Utilizing layer transparency tool for displaying multiple layers at one time.
- Creating variable rate prescription maps.
- Printing extensive chemical, seed, equipment, and other field reports.
- Viewing profit maps.
- Integrating financial records to print enterprise statements on fields, livestock groups, and equipment.

VIEW AND PRINT MAPS

FEATURES:

- Read and write data from a wide range of precision farming devices.
- Build a list of clients, farms, and field names and write the data to precision farming devices for data management.
- View and print maps with legend.
- Can be upgraded to Farm Works office solutions for additional field reporting, layering, accounting, and mapping analysis.
- Display and print guidance paths from supported precision farming devices.

OFFICE REQUIREMENTS:

- Desktop computer with Microsoft® Windows® 2000 or higher (includes Windows XP, Windows Vista®, and Windows 7).
